## Introduction

The IEEE Guntur Subsection successfully organized a Digital Literacy awareness program on 2 April 2026 at VVIT University for students of VIVA School, with the objective of promoting basic digital and technical knowledge among school students. The event was sponsored by Efftronics Pvt. Ltd., Mangalagiri, and was conducted with the support of IEEE student members. This initiative aimed to introduce students to fundamental concepts in electronics. Students from classes 6, 7, and 9 of VIVA School actively participated in the Digital Literacy program conducted at VVIT University. The event provided students with an opportunity to explore the basics of logic gates, ICs, and seven-segment displays through demonstrations.

## Guests

- Dr. Koya Srinivasarao — Director, VIVA School
- Dr. Y. Mallikarjuna Reddy — Registrar, VVIT University
- Dr. Shaik Enaul Haq — HOD, ECE Department, VVIT University

## Mentors

- M. Sahithya
- K. Rechal Joy
- P. Pravallika

*Dignitaries and guests at the inaugural session*

## Framework of the Program Day (02-04-2026)

| Activity          | Time     |
|-------------------|----------|
| Event Started     | 9:00 AM  |
| Welcome Speech    | 9:05 AM  |
| Guest Speech      | 9:10 AM  |
| Session by Hosts  | 9:30 AM  |
| Lunch Break       | 12:00 PM |
| Session Restarted | 1:00 PM  |
| Hands-on Guidance | 2:30 PM  |
| Event Ended       | 3:50 PM  |

*Student mentors presenting the Digital Literacy Workshop on the fundamentals of logic gates*

---

## Event Overview

The Digital Literacy program was conducted at VVIT University for students of classes 6, 7, and 9 from VIVA School. The sessions focused on introducing students to the basics of digital electronics in an interactive and understandable manner. IEEE student members explained the concepts of logic gates, logic gate ICs, and seven-segment displays, highlighting their functions and practical significance in electronic systems. The sessions were designed to help students understand the importance of digital technology and its role in everyday life.

---

## Objectives

- To create awareness among school students about digital literacy and the fundamentals of electronics.
- To introduce students to the concepts of logic gates, logic gate ICs, and seven-segment displays through interactive sessions.
- To encourage students to develop interest in technology and gain practical understanding of digital electronics at an early stage.

*Students engaging with digital IC trainer kits during the hands-on session*

---

## Session Details

As part of the Digital Literacy program, IEEE members conducted sessions explaining the basics of logic gates and their role in digital circuits. Students were introduced to logic gate ICs and their practical usage in electronic devices. The mentors also demonstrated and explained their applications in displaying numerical outputs in electronics. The sessions were made interactive to ensure better understanding, and students participated with enthusiasm, asking doubts.

*Mentors guiding students through practical exercises*

*Students presenting on universal gates during the interactive session*

## Conclusion

The Digital Literacy program organized by IEEE Guntur Subsection at VVIT University for VIVA School students was successfully conducted and served as an effective initiative in introducing students to the basics of digital electronics. The sessions on logic gates and logic gate ICs helped students gain practical understanding. The IEEE Guntur Subsection expresses sincere gratitude to the management of VIVA School, Efftronics Pvt. Ltd., the invited guests, mentors, and all participating students for contributing to the success of the event.
